

SPECIFICATION OF RUBBER INSERTION SHEET

Specification of Rubber Insertion Sheets of different sizes are as below :

1. Size – 3 mm thickness

- i) Confirming to IS 638 – 1979
- ii) Type – A
- iii) Grade – 2
- iv) Duty – Joints subjected to water and air pressure.
- v) Minimum breaking load of Fabric Reinforcement - 120 N/cm – both warp and weft direction
- vi) No. of Fabric Plies – 2
- vii) Tensile Strength – 6 MN/m^2
- viii) Elongation at break Percent (Min) - 350

2. Size – 6 mm thickness

- i) Confirming to IS 638 – 1979
- ii) Type – A
- iii) Grade – 2
- iv) Duty – Joints subjected to water and air pressure.
- v) Minimum breaking load of Fabric Reinforcement - 120 N/cm – both warp and weft direction
- vi) No. of Fabric Plies – 3
- vii) Tensile Strength – 6 MN/m^2
- viii) Elongation at break Percent (Min) - 350
